Projects

Full Stack app

SandoRaw

Nov 2021 - Current

This is my Strive School capstone project (runs in develop mode). SandoRaw is a social marketplace for junior photographers that allows them to book or been booked, as well as sell specific canvas printed pictures or custom goods.

At sandoRaw I used technologies such as :

- ReactJS, Redux, TypeScript, Material UI, Express, Socket IO, Stripe, MongoDB, Leaflet.

Currently, I'm refactoring & fixing my project, also adding new features.

Front End app

Click Weather (Web)

Dec 2021 - Current

Click Weather is a pet-project. The application defines user location by IP (or strictly from your GPS in Profile page) and fetches the weather data from OpenWeatherAPI.

At Click Weather(Web) I used technologies such as :

- NextJS, Redux, Bootstrap, Leaflet

React Native

Click Weather

Jan 2022 - Current

This application is a copy of my Click Weather (Web) app, which is ported to React Native with minor differences.
